

INTERNATIONAL MEETING

2021

BIOLOGY OF THE HEPATITIS B AND D VIRUSES

VIRTUAL • TORONTO • CANADA

Sept 26 – 30, 2021

**PARTNERSHIP
INVITATION**

WELCOME FROM THE CO-CHAIRS

Dear Colleagues,

At last, it is our pleasure to invite you to support the 2021 International HBV Meeting to be held September 26 – 30, 2021 as a hybrid virtual and in-person meeting in Toronto, Canada.

While it's been a long road to get here, the 2021 meeting promises to deliver:

- Exposure to cutting-edge unpublished data in HBV research
- Engaging presentations on the latest conceptual and technical advances in HBV research
- Joint discussions on the latest therapeutic advances in HBV and HDV
- Opportunities to network with an international HBV community in all stages of their career
- An established trainee-centric platform for graduate students and post-doctoral scholars

We invite you to participate in both the hybrid and on-demand program which will remain accessible for all participants and sponsors for months following the main meeting dates.

The 2021 meeting will feature an outstanding scientific program, a range of ways for partner organizations to present content and a unique digital experience uniting 600+ delegates from across the globe.

We hope you will join us in making the 2021 International HBV Meeting possible.

Sincerely,

O. Andrisani

The International HBV Meeting

The International HBV Meeting aims to provide an essential forum for researchers to share their discoveries, questions and insights through an interactive environment. With a history dating back to 1985, it continues to be the definitive international scientific meeting focused exclusively on the hepatitis B (HBV) and hepatitis D (HDV) viruses. This annual scientific meeting continues to bring the global thought leaders in the field together with young and emerging scientists working on hepatitis B virus (HBV), hepatitis delta virus (HDV), and hepatocellular carcinoma (HCC). Many, if not most, of the major discoveries in HBV and HDV were first reported at this meeting and have directly impacted drug discovery and other research that has advanced the science and medicine of HBV and HDV.

Who Attends

Industry professionals, graduate students, post-doctoral scholars, and scientists interested in all aspects of the biology of hepatitis B viruses, including:

- Biochemistry
- Molecular biology
- Traditional virology
- Immunology
- Pathogenesis
- HBV-induced cancer
- Latest therapeutic advances against HBV and HDV

Session Topics

Preliminary program topics include:

- Preclinical targets and therapies for chronic hepatitis B
- New technologies for liver research
- Application of new technologies and advances in models for the study of HBV
- HBV replication, gene expression and egress
- HBV integration, genotypes and HCC
- Viral entry, cccDNA biogenesis and homeostasis
- Innate immunity to HBV infections
- Adaptive immunity to HBV infection
- Co-infection and pathogenesis
